- Adaptable & Curious – Open to change, eager to explore new ideas, and always ready to learn more.

#### Projects & Learning

---

- To Do App
- Tic Tac Toe Game

#### Objective

---

I'm a Computer Science student driven by curiosity and a passion for building things that matter. Over the course of my academic journey, I've explored the fundamentals of web development, programming, and problem-solving through hands-on projects and personal experimentation. These experiences have not only shaped my technical foundation but also sparked a deeper interest in how thoughtful technology can solve real-world problems.

Now, I'm looking for an opportunity where I can turn this learning into impact—where I can work with a team, take on challenges, and grow through collaboration and feedback. I believe in staying curious, asking questions, and constantly evolving with the fast-moving world of tech. I'm excited to contribute, learn, and be part of something meaningful.
